5 water treatment

Water quality varies from location to location and by state. Incoming water supply into machinery needs to satisfy the requirements of the La Marzocco water calculator -

<https://techcenter.lamarzocco.com/jsp/Template4/watercalculator.jsp>

	Minimum	Maximum
Total dissolved solids (ppm)	90	150
Total hardness (ppm)	70	100
Total Iron (ppm)	0	0.2
Free chlorine (ppm)	0	0.05
Total chlorine (ppm)	0	0.1
pH	6.5	8
Alkalinity (ppm)	40	80
Total chlorides (ppm)	0	30

Subject to results from the calculator a water filtration device will be recommended in order to ensure warranty on equipment. The customer acknowledges that in many instances it will be necessary to install a reverse osmosis unit rather than a simple carbon filtration unit.
